Bill McKibben is passionate about creating an economy that builds community and ennobles our lives. He is able to challenge some of our entrenched beliefs about the economy. He observes what many of us are beginning to see that "more" is no longer synonymous with "better"- indeed at this time in history, they have almost become opposites. McKibben puts forward a new way to think about the things we buy, the food we eat and the money that pays for it all.
